Global warming is a global issue that requires global response. The University campus is an architectural marvel. The programmes offered are all residential programmes. A fully residential campus has world class infrastructure and support facilities. With emphasis on environment and ecological equilibrium, the University is developing a lush green campus spread over 511 acres with approximately 127 acres of green area in which more than 50,000 trees are already planted. As it is believed, trees are of continued importance to the environment for their emotive power and their importance to other forms of life, the horticulture plan and plantation drive attribute mainly to the following ecological aspects:

- Soil Erosion,
- Wind Filtration,
- Temperature Control,
- Green Atmosphere, and
- Retention of Water Level

The external fencing of the University is marked with hundreds of Bodhi Trees that bear immense significance in Buddhist Civilization and harmony. The Bodhi Tree strip runs on the entire circumference of the external campus fencing, parallel to the green belt with all kinds of flora and vegetation. Apart from these green strips, a beautiful and rich green landscaping is coming along with buildings, walking track, huge lawns, and water bodies.
